

Preface

The 2025 International Conference on Advanced Technology and Social Sciences (ATSS 2025) have been held from February 21 to 23, 2025, in Liverpool, UK. This conference represents a significant step forward in promoting global collaboration and advancing research across the ever-evolving fields of advanced technology and social sciences. ATSS 2025 provides a premier platform for experts, scholars, and researchers worldwide to come together, share insights, and discuss the latest developments, emerging trends, and key challenges in these transformative areas.

The primary objective of ATSS 2025 is to stimulate comprehensive discussions and foster knowledge exchange among scholars, industry leaders, and policymakers. By presenting groundbreaking research, the conference will highlight ongoing advancements in technology and social sciences, emphasizing the pivotal role of international cooperation in driving scientific progress. Moreover, ATSS 2025 showcase the practical applications of research and its potential to solve pressing global issues.

This event feature an array of keynote addresses, academic presentations, and panel discussions, providing valuable opportunities for participants to engage with thought leaders and collaborate with peers from diverse fields. These exchanges will not only contribute to the progress of technology and social sciences but also reinforce the importance of interdisciplinary partnerships in addressing complex global challenges.

We extend our sincere gratitude to all contributors and partners whose involvement has been vital to the event's success. We are confident that the connections made and the ideas exchanged will continue to inspire innovation and collaboration long after the conference concludes.

With best regards,

Conference Committee of ATSS 2025
