

Preface

2nd International Conference on Economic Management and Intelligent Society (EMIS 2025) successfully held from June 27-28, 2025 in Zhengzhou, China, marked a significant milestone in fostering global collaboration and advancing research in the dynamic fields of economic management and intelligent society. This conference provided a vital platform for experts, scholars, and researchers from around the world to gather and exchange insights on the latest developments, emerging trends, and critical challenges in these transformative domains.

EMIS 2025 aimed to facilitate deep discussions and knowledge sharing among scholars, industry professionals, and policymakers. By showcasing the most recent research achievements, the conference not only highlighted the progress being made in economic management and intelligent technologies but also emphasized the importance of international cooperation in driving scientific innovation. Through these interactions, the conference fostered new avenues for the practical application and translation of scientific research outcomes into solutions that address the pressing issues of our time.

The event featured a wide range of keynote speeches, academic presentations, and panel discussions, offering participants valuable opportunities to engage with thought leaders and collaborate with peers from diverse academic and professional backgrounds. These exchanges not only contributed to advancing the fields of economic management and intelligent society but also reinforced the essential role of interdisciplinary collaboration in tackling complex global challenges.

We extend our deepest gratitude to the International Association of Applied Science and Technology (IAAST) for their dedicated support in organizing EMIS 2025, which played a key role in making the conference a resounding success. Their commitment to fostering academic exchange and global research cooperation was instrumental in creating a truly enriching experience for all participants. We also sincerely thank all contributors and supporters whose involvement was essential to the success of the event. We hope the connections made and ideas shared will continue to inspire innovation and collaboration for years to come.

With best regards,

Conference Committee of EMIS 2025
